### **FRANCIS BACON IN YOUR BLOOD**

by Michael Peppiatt

As a young art history student, Peppiatt was whirled into Bacon's inner circle of Lucian Freud and some variously camp and sinister hangers-on. Since his acclaimed 1996 scholarly biography, *Francis Bacon: Anatomy of an Enigma*, Peppiatt has been waiting to tell the more personal side of the story, and the narrative comes hurtling intoxicatingly off the page.

### **A BEAUTIFUL QUESTION**

by Frank Wilczek

A book that induces an almost vertiginous sensation of peering through layers of theories down to the true nature of the universe. Wilczek, a Nobel Prize-winning theoretical physicist, sets out to answer a deceptively simple question: "Does the world embody beautiful ideas?" This is, at times, a challenging text, but is well worth the effort.

### **THIS IS LONDON**

by Ben Judah

Judah has travelled the length and breadth of London, talking to those too often airbrushed from the picture: the immigrants, the underclass, the Tube cleaners and dishwashers whose work, often invisible, allows the rest of us to live our gilded lives. This is an important book – one that should open our eyes to the price others often pay for our comfort.
